

CONTENTS

DAX Mastery 2025	2
📅 Week 1 – DAX Foundations	2
Day 1 – Introduction to DAX & Power BI	2
Day 2 – Data Model Basics	2
Day 3 – Calculated Columns vs. Measures	2
Day 4 – Date Tables & Time Setup	2
Day 5 – Aggregation Functions in DAX	3
⚙️ Week 2 – Contexts and Calculations	3
Day 6 – Filter Context	3
Day 7 – Row Context & Context Transition	3
Day 8 – CALCULATE Deep Dive.....	3
Day 9 – FILTER, ALL & ALLSELECTED	3
Day 10 – Logical Operators & DAX Syntax Best Practices	3
🚀 Week 3 – Advanced DAX Concepts	4
Day 11 – VALUES, DISTINCT & Table Functions	4
Day 12 – Iterators (X-Functions).....	4
Day 13 – RANKX and IF Logic	4
Day 14 – Variables in DAX	4
Day 15 – Mini Project: KPI Measures	4
📊 Week 4 – Time Intelligence & Real-World Reporting	4
Day 16 – Introduction to Time Intelligence	4
Day 17 – Advanced Time Calculations	4
Day 18 – DAX Query View	5
Day 19 – Formatting and Presentation	5
Day 20 – Quick Measures in Power BI	5
🧠 Week 5 – Expert Level & 2025 Innovations	5
Day 21 – Calculation Groups	5
Day 22 – Field Parameters & Dynamic Measures.....	5
Day 23 – Performance Optimization.....	5
Day 24 – DAX in Microsoft Fabric.....	5
Day 25 – Using Copilot for DAX	6
Day 26 – Security in DAX.....	6
Day 27 – Documentation & Governance	6

Day 28 – Mini Project: Profitability Dashboard.....	6
Day 29 – Final Project Submission.....	6
Day 30 – Certification & Next Steps	6

DAX Mastery 2025

30-Day Complete Learning Plan — from Fundamentals to Microsoft Fabric Integration

Week 1 – DAX Foundations

DAY 1 – INTRODUCTION TO DAX & POWER BI

- Welcome & Course Overview
- Understanding What DAX Is
- Power BI vs. Excel: Key Differences
- Our Dataset and Project Setup
- Installing Power BI Desktop and Exploring Interface

DAY 2 – DATA MODEL BASICS

- Understanding Tables, Relationships, and Cardinality
- Star Schema vs. Snowflake Schema
- Importance of Relationships in DAX
- Creating Relationships in Power BI

DAY 3 – CALCULATED COLUMNS VS. MEASURES

- Differences and Performance Considerations
- Creating Calculated Columns
- Creating Measures
- Real-World Examples

DAY 4 – DATE TABLES & TIME SETUP

- CALENDAR vs. CALENDARAUTO
- Creating a Full Date Table with Fiscal Years
- Customizing Date Hierarchies

- Reusing Date Scripts Across Projects

DAY 5 – AGGREGATION FUNCTIONS IN DAX

- SUM, AVERAGE, MIN, MAX, COUNT
- COUNTROWS, COUNTA, COUNTBLANK
- Using DISTINCTCOUNT for Unique Values
- Exercises + Solutions

Week 2 – Contexts and Calculations

DAY 6 – FILTER CONTEXT

- What is Filter Context?
- How Filters Affect Measures
- Using Visual Filters and Page Filters
- Hands-on Example: Filtering by Category

DAY 7 – ROW CONTEXT & CONTEXT TRANSITION

- Row Context in Calculated Columns
- Using X-Functions (SUMX, AVERAGEX)
- Understanding Context Transition in CALCULATE

DAY 8 – CALCULATE DEEP DIVE

- Syntax and Core Behavior
- How CALCULATE Changes Filter Context
- Practical Examples with CALCULATE

DAY 9 – FILTER, ALL & ALLSELECTED

- FILTER Function: How It Works
- ALL, ALLSELECTED, ALLEXCEPT Differences
- Common Use Cases for Removing Filters
- Practice Exercises

DAY 10 – LOGICAL OPERATORS & DAX SYNTAX BEST PRACTICES

- AND, OR, NOT in DAX
- Commenting & Formatting DAX Formulas
- Creating Readable and Efficient Code

Week 3 – Advanced DAX Concepts

DAY 11 – VALUES, DISTINCT & TABLE FUNCTIONS

- Understanding VALUES()
- Using DISTINCT and SELECTCOLUMNS
- Practical Example: Distinct Product Count

DAY 12 – ITERATORS (X-FUNCTIONS)

- SUMX, AVERAGEX, COUNTX Explained
- When to Use Iterators vs. Simple Aggregations
- Performance Considerations

DAY 13 – RANKX AND IF LOGIC

- Ranking by Sales, Profit, etc.
- Conditional Logic Using IF and SWITCH
- Creating Top-N Reports

DAY 14 – VARIABLES IN DAX

- Introduction to VAR and RETURN
- Improving Readability and Efficiency
- Debugging DAX with Variables

DAY 15 – MINI PROJECT: KPI MEASURES

- Gross, Net, and Profit Measures
- Combining Measures with Filters
- Creating Key Measures Table

Week 4 – Time Intelligence & Real-World Reporting

DAY 16 – INTRODUCTION TO TIME INTELLIGENCE

- Understanding Date Context
- DATEADD, DATESYTD, TOTALYTD
- Practical Time Calculations

DAY 17 – ADVANCED TIME CALCULATIONS

- Month-to-Date (MTD), Quarter-to-Date (QTD)

- Using DATESBETWEEN
- Comparing Periods Dynamically

DAY 18 – DAX QUERY VIEW

- Introduction to DAX Query View
- Writing Queries to Test Measures
- Debugging and Optimization

DAY 19 – FORMATTING AND PRESENTATION

- ROUND, FORMAT, and Custom Formatting
- Formatting Dates, Times, and Currency
- Applying Consistent Report Styles

DAY 20 – QUICK MEASURES IN POWER BI

- Using Quick Measures Wizard
- Time Intelligence, Rolling Averages, Aggregations
- Filters and Mathematical Operations

Week 5 – Expert Level & 2025 Innovations

DAY 21 – CALCULATION GROUPS

- What Are Calculation Groups?
- Creating Reusable Time Intelligence Patterns
- Implementing in Power BI Desktop (2025 Update)

DAY 22 – FIELD PARAMETERS & DYNAMIC MEASURES

- Creating Dynamic Metric Selection
- Switching Between Measures with Parameters
- Interactive Dashboards Example

DAY 23 – PERFORMANCE OPTIMIZATION

- Understanding VertiPaq Engine
- Using DAX Studio & Performance Analyzer
- Optimizing Context Transitions

DAY 24 – DAX IN MICROSOFT FABRIC

- Direct Lake Mode Overview

- Connecting to Lakehouse Data
- Fabric Integration for Enterprise Analytics

DAY 25 – USING COPILOT FOR DAX

- Generating Measures with AI
- Explaining DAX Formulas Using Copilot
- Debugging & Refactoring Suggestions

DAY 26 – SECURITY IN DAX

- Row-Level Security (RLS)
- Object-Level Security (OLS)
- Dynamic User-Based Filtering

DAY 27 – DOCUMENTATION & GOVERNANCE

- Best Practices for DAX Naming
- Version Control for Power BI Files
- Maintaining Enterprise Models

DAY 28 – MINI PROJECT: PROFITABILITY DASHBOARD

- Building a Report from Scratch
- Applying DAX Calculations and Time Logic
- Designing Visuals and Layout

DAY 29 – FINAL PROJECT SUBMISSION

- Reviewing All Measures and Reports
- Testing & Optimization
- Publishing to Power BI Service

DAY 30 – CERTIFICATION & NEXT STEPS

- Final Quiz & Evaluation
- Project Presentation
- Certification Download
- Continuing Learning Paths (Power BI, Fabric, AI)
